P values for comparisons between acute and 3 month values: [†] = p < 0.05, [‡] = p < 0.01, [#] = p < 0.001. P values for comparisons between controls and 3 months TTC data: [‡] = p < 0.01, ^{##} = p < 0.05; * = data not available in 3 control subjects. LVEDVi = left ventricular (LV) end-diastolic volume index, LVESVi = LV end-systolic volume index, LVEF = LV ejection fraction, E/A = ratio of peak early to peak late transmitral diastolic flow, GLS = global longitudinal strain.
